Right to Work : Eligible to work in the UK — no sponsorship required.

SUMMARY

Salesforce Developer & Consultant with over six years of experience in software and CRM solutions, including three years of hands-on Salesforce consulting. **Salesforce Certified Developer 2** and multi-certified professional with strong product knowledge across **Sales Cloud, Service Cloud, Experience Cloud, Data Cloud and Agentforce**.

Experienced in configuring Salesforce to meet business requirements, including user management, security model (profiles, permission sets, roles), declarative automation (Flows, validation rules, approval processes), and reports & dashboards. I have delivered CRM functionality end-to-end for multiple clients, working closely with stakeholders to gather requirements, design solutions, and support users through go-live and beyond.

Comfortable working in **Agile environments**, collaborating with cross-functional teams (business, IT, developers), and supporting continuous improvement through release management, data quality, and user training.

SKILLS

Salesforce & CRM

Sales Cloud | Service Cloud | Experience Cloud | Data Cloud | Agentforce | User & Access Management | Role Hierarchy | Permission Sets | Profiles | Page Layouts | Record Types | Validation Rules | Email Templates

Configuration, Automation & Reporting

Flows | Approval Processes | Workflow (legacy) | Assignment Rules | Salesforce Reports & Dashboards | Dynamic Forms | Data Loader | Data Import Wizard | Duplicate Management | Change Sets

Development & Integration (Supportive to Admin Role)

Lightning Web Components (LWC) | Aura Components | Apex (Triggers, Batchable, Future, Invocable) | SOQL / SOSL | Visualforce Pages | MuleSoft (API-led integration) | REST & SOAP APIs | DataWeave

DevOps & Ways of Working

Copado | Git / GitLab | CI/CD | Agile / Scrum | Requirements Gathering | Stakeholder Management

Programming & Databases

Apex | Java | C# | JavaScript | HTML & CSS | jQuery | SQL | Oracle | MySQL | PostgreSQL | IBM DB2

Soft and Interpersonal Skills

Effective communication | Active listening | Stakeholder engagement | Problem solving | Critical thinking | Teamwork | Cross-functional collaboration | User training & support | Self-motivated

EXPERIENCE

Salesforce Administrator / Consultant

Clyde Ventures – Manchester, United Kingdom (Client: SEFE Energy UK)
Oct 2025 – Present

- Working as a client-facing Salesforce Administrator and consultant for **SEFE Energy UK**, supporting their B2B energy sales operations.
- Administering **Sales Cloud and Energy & Utilities Cloud**: managing users, profiles, permission sets, role hierarchy, page layouts, record types, and validation rules.
- Building and maintaining **Flows and declarative automation** to support lead management, opportunity tracking, and forecasting processes.
- Configuring and optimising **reports and dashboards** for sales, operations, and leadership to provide visibility of pipeline, performance and KPIs.
- Supporting **platform health and security** by monitoring login/access, field-level security, data integrity and environment management (sandboxes, change sets).
- Assisting with **release management** and deployments in collaboration with developers, using change sets and Copado.
- Providing **end-user support and training**, resolving issues, answering “how-to” queries and helping new users adopt Salesforce best practices.

Technical Consultant

Tectonic Pvt. Limited – Karachi, Pakistan

Jan 2022 – Nov 2024

- Implemented Salesforce Service Cloud for a large-scale client, meeting 100% delivery milestones and increasing agent productivity by 35%.
- Configured case management, queues, email-to-case, assignment rules, and SLAs, aligning Salesforce configuration with business service processes.
- Engineered real-time data synchronisation between Salesforce and SQL Server/other systems, improving data accuracy and reducing latency by 40%.
- Delivered 3+ end-to-end integrations using MuleSoft’s API-led architecture, enhancing connectivity between Salesforce (Service Cloud, Data Cloud) and external platforms and improving data sync efficiency by 60%.
- Acted as a trusted advisor to stakeholders, leading solution design workshops, documenting requirements and translating them into Salesforce configurations and enhancements.
- 12x Salesforce Certified Developer with strong skills in Apex, LWC, Visualforce, Batchable Apex, Triggers and Flows, used to extend standard Salesforce functionality where needed.
- Directed a team of 3 Salesforce developers, promoting best practices, code standards and reuse, and delivering projects 20% ahead of schedule.

Senior Software Engineer

Techlogix Pvt. Limited - Karachi, Pakistan

Jan 2021 – Dec 2021

- Integrated IRIS flows on IBM Integration Bus (IIB) for Bank AL Habib’s Debit Card module, boosting internet banking transaction efficiency by 45%.
- Diagnosed and resolved over 10+ critical production issues in Bank AL Habib, improving system stability and reducing downtime by 30%.
- Led Disaster Recovery (DR) simulates across key banking systems, ensuring 100% compliance with regulatory business continuity standards.
- Developed a customer information amendment application for UBL in collaboration with IBM, streamlining customer data workflows and reducing manual intervention by 70%.
- Completed advanced training and certification in MuleSoft, preparing for scalable integration projects and future client needs.

Software Engineer

Wemsol Pvt. Limited (KEENU) - Karachi, Pakistan

Apr 2018 – Jan 2021

- Integrated 10+ payment providers into the NetConnect gateway, expanding transaction support and increasing digital payment volume by 50%.
- Built secure and scalable web and Windows services using .NET and C#, leveraging RSA encryption to ensure end-to-end data protection across payment systems.
- Delivered full SDLC contributions—from requirements gathering to deployment—for high-impact projects, achieving 99.9% service uptime in production.
- Led code reviews, mentored 3 junior developers, and managed Git branch merges, improving code integration speed by 30% and reducing release errors.

PROJECTS

SEFE ENERGY UK – SALESFORCE ADMIN & MULESOFT (CLYDE VENTURES)

- Acted as Salesforce Admin and consultant for **SEFE Energy UK**, supporting B2B energy sales on Sales Cloud and Energy & Utilities Cloud.
- Configured lead and opportunity management (record types, page layouts, validation rules, Flows) to align with SEFE's sales processes.
- Built and enhanced **reports and dashboards** to give sales and management visibility of pipeline, conversion and forecasting.
- Implemented MuleSoft-based integrations between Salesforce and **Experian / Dun & Bradstreet** for automated lead verification and enrichment, improving data quality and reducing manual checks.
- Optimised the **Gorilla forecasting** integration in MuleSoft, improving response times and forecast availability for business users.
- Provided **user training and how-to guidance**, helping sales and operations teams adopt new Salesforce functionality and best practices.

BRECKENRIDGE GRAND VACATIONS – SALESFORCE (TECTONIC)

- Delivered end-to-end Sales Cloud implementation, customizing lead, contact, and opportunity functionalities to align with client-specific sales processes and workflows.
- Integrated Salesforce with third-party systems such as Chase Data and Zingle using REST APIs and Apex-based custom development, improving cross-platform communication and reducing manual intervention by 50%.
- Developed and deployed a scalable contact and lead merging solution, eliminating data duplication and improving record accuracy by 60%.
- Led the resolution of complex data migration issues using Data Loader and Workbench, ensuring seamless migration of historical data with zero critical data loss.
- Managed the full project lifecycle, from discovery and development to deployment and post-go-live support, achieving on-time delivery and a 40% reduction in post-deployment defects.

BILTMORE – SALESFORCE & MULESOFT (TECTONIC)

- Delivered cross-cloud implementation by integrating Service Cloud, Data Cloud, and Marketing Cloud, streamlining multi-channel customer engagement across business units.
- Led end-to-end MuleSoft integration, architecting API-led connectivity between Salesforce and external

systems including SMS gateways, CounterPoint, and ETIX, enabling real-time data flow and reducing manual syncing by 70%.

- Implemented scalable case management solutions (Email-to-Case, Web-to-Case), improving customer support response times by 40%.
- Designed and deployed complex APEX-based logic for contact merging and record re-parenting, improving data hygiene and user efficiency.
- Championed integration strategy across Salesforce modules and external platforms, ensuring seamless connectivity and reducing integration defects by 50%.

Cherokee Nation – SALESFORCE & MULESOFT (TECTONIC)

- Architected and developed a custom Salesforce Community from the ground up using Lightning Web Components (LWC) and Aura Components, enhancing user experience and engagement by 50%.
- Designed and implemented complex Aura components to support dynamic UI rendering, efficient data binding, and seamless cross-component communication.
- Built automation workflows using Flows and Process Builder, reducing manual effort and increasing operational efficiency by 30%.
- Developed MuleSoft integration flows to seamlessly ingest external data into Salesforce, enabling real-time data availability and streamlined business processes.

EDUCATION

UNIVERSITY OF EAST ANGLIA — MSc DIGITAL BUSINESS AND MANAGEMENT

Sep 2023 – Sep 2024

- During my degree program, I focused on the business aspects of software implementation and digital transformation, taking courses such as Marketing and Supply Chain Management. These courses enhanced my skills in understanding projects from a business perspective.
- My dissertation was a research-based report on the Impact of Emerging Digital Technologies on Employee Outcomes for Professional Service Providers in the Software Industry. I conducted interviews with software employees from various companies in Pakistan and performed a thematic analysis of the findings.
- I received distinction in my dissertation.

BAHRIA UNIVERSITY — MASTER OF SOFTWARE ENGINEERING

Sep 2019 – Aug 2021

- During my program, I focused on advanced computer science concepts such as algorithms, data structures, and advanced software engineering principles as well as AI based elective courses.

BAHRIA UNIVERSITY — BACHELOR OF SOFTWARE ENGINEERING

Sep 2013 – Aug 2017

- During my program, I focused on core computer science concepts such as algorithms, data structures, and software engineering principles.
 - For my final year project, I developed a human tracking system, which included an Android app and a web-based portal for managing tracked individuals.
